## Textile Training on Demand

Carpet technology is a multimedia learning system that provides fundamental underpinning knowledge on carpet technology.

### Who is it for?

- Trainees employed in the carpet manufacturing industry or carpet retailing
- Students studying textile courses
- Non-textile professionals who are now working in the industry
- Textile specialists who wish to broaden their knowledge

### Contents

The content, which has been mapped to Level 3 UK National Vocational Qualifications covers:

- Overview of carpet manufacture
- Fibres and yarns used in carpets
- Shedding and weft insertion principles
- Axminster woven carpets
- Wilton carpet manufacture
- Face-to-Face woven carpets
- Backing and finishing of carpets
- Carpet coloration
- Quality control and testing
- Woven carpet fault diagnosis and analysis
- Tufted carpet fault diagnosis and analysis
- Health and Safety

### Features

- A menu driven, interactive, self-paced learning environment
- Text, graphics, photos and videos to describe and illustrate the technology used
- Glossary of textile terms and definitions
- Tests to evaluate learning
- Bibliography of references for further reading

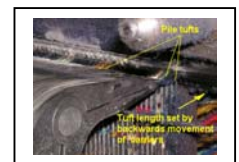

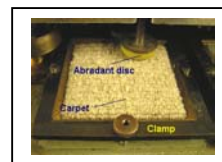

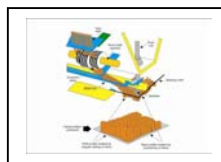

### Benefits

- Allows learners to study at a time and place convenient to them
- Complements skills development
- Can be incorporated into a "Blended learning" programme
- Can be integrated into company training programmes

### Testimonials

- "I found the CD Rom very user friendly"
- "I have been in the Industry as a tuner for 35 years and I was learning. This CD Rom is better than anything else currently available for under pinning knowledge as far as I am aware."
- "This material would be very useful to me as a training instructor in converting engineering apprentices to a loom technician role"
- "I thought that the CD was very informative giving a very accurate content of the carpet manufacturing process"
- "Very relevant to our sector as there has not been any of this material available for 15 years"
